

PRODECOR „Q“

The square-edged profile with broad face edge

PRODECOR is the first choice square-edged profile, especially for rooms laying great claim to aesthetic design. The broad face edge is an attractive boundary element and provides a decorative solution for joints in permanent flooring.

PRODECOR „Q“ made of solid brass, aluminium and stainless steel

1.4301 (V2A)

Areas of application

- For particularly decorative joints in rooms with high aesthetic requirements.
- Protects against mechanical stress and damage and acts as an end cover for flooring outer edges.
- Decorative boundary for floor coverings e.g. tiles, natural stone, parquet, laminate flooring and carpet.
- Decorative separation of two different types of flooring.

Corner elements usable as external and internal corner.

Made of aluminium with imitated surface or real stainless steel.
