

# PRONIVO

## Transition and compensator profile for floors.

If you're looking for a highly versatile profile that is always on top form, then look no further! With PRONIVO you have a choice between three different models, which all have one thing in common: they eliminate the danger of stumbling over raised edges.

## PRONIVO “S” with bevelled face edge.

### Materials and colours

#### Solid brass

Plain

Polished

#### Anodized aluminium

Matt silver

### Areas of application

- Transition between floorings of different types and heights (e.g. between tiles and carpet).
- Protection of abutting flooring edges (particularly tile edges) against impact damage.
- Reduces the risk of tripping on stairs. The bevelled face edge of the transition profile has an angle of approximately 38° and the stop edge with a height of approximately 3 mm provides for a flush connection with the flooring.

### Dimensions

**Profile heights (H):**  
from 8 mm to 12.5 mm

**Profile lengths:**  
250 cm, 300 cm
