

PROROUND in rigid PVC,
with external corner element.

PROROUND in rigid PVC,
with internal corner element.

PROROUND in rigid PVC, in wall area.

EXPERT Tip!

This is how to achieve a good cut: practical, solid and precise. The profile can be cut at an angle of exactly 45° using the PROLINE bevelling shears (which can, of course, be adjusted to cut any other angle). The ends meet exactly at the joint – which guarantees an optically a perfect result. The bevelling shears are suitable for profiles made of rigid PVC.

PROROUND in rigid PVC with a shiny surface.

Materials and colours

Rigid PVC

		
Brilliant white	Light grey	Red
		
Off white	Manhattan grey	Black
		
Pergamon	Pastel pink	Yellow
		
Jasmine	Pastel blue	Royal blue
		
Bahaman beige	Pastel green	

Areas of application

Exclusively for wall areas.

The areas of application are identical to those of PROROUND in aluminium for wall areas.

With external and internal corner elements in PVC.

Dimensions

Profile heights (H):

6 mm to 12.5 mm

Profile lengths:

250 cm, 300 cm
