

PROROUND stainless steel between tiles and carpet.

PROROUND external and internal corner element.

PROROUND stainless steel in step areas.

EXPERT Tip!

How to cut stainless steel correctly:

Cut the stainless steel profile with a special stainless steel cutting disc. Advantage: extended durability and virtually colourless and angle-free cut. Please note: do not allow sparks to fly in the direction of the stainless steel profile – danger of rusting!

PROROUND made of stainless steel and solid brass.

Materials and colours

Solid Brass

Plain

Polished

Chrome-plated

Stainless steel

Highly polished stainless steel 1.4301 (V2A)

EShiny stainless steel 1.4301 (V2A)

Brushed stainless steel 1.4301 (V2A)

Matt stainless steel 1.4401 (V4A)

Areas of application

Floors • Protection against mechanical stress and damage and decorative enhancement of tile outer edges.

- Boundary element for floor coverings such as tiles, natural stone, parquet, laminate flooring and carpet.

- Pedestal and cover edge separation on stairs.

Walls • Protection and decorative enhancement of tile outer edges.

- Decorative round-ended finishing element as an alternative to the square-edged profile.

- For design-oriented, timeless decoration of bathrooms and other rooms.

With external and internal corner elements.

Made of aluminium with a steel look finish and real stainless steel.
